

Virtual Presentation Series

Based on the film “Friends Along the Mullica” created by Go Green Galloway. This film addresses environmental issues being experienced within various towns along the Mullica River/Great Bay Estuary including storm water management, invasive plants, stresses from climate change (flooding, marsh loss, etc.) and marine debris/litter/illegal dumping.

Program participants will also have an opportunity to get involved in community-action events related to each topic later in the spring of 2022! Details on community-action opportunities will be provided during each presentation.

“Marine Debris, Plastics, and Illegal Dumping”

When: January 27th, 2022. 7:00pm-8:00pm
Speakers: JC NERR Watershed Ambassador, Paul Signore, Director of Atlantic County Clean Communities Program, Rebecca Turygan, and LBI Township’s Sustainability Coordinator, Angela Andersen.
